

Understanding Medicare:

Providing patients with information to evaluate Medicare insurance options during Open Enrollment

MEDICARE

MEDIGAP

MEDICARE ADVANTAGE

Medicare is a program for people who are 65 years or older or have certain disabilities

Questions that may help assess your patients' current insurance needs:

MEDICARE ESTABLISHED PATIENTS

- Can they reconfirm their current coverage with Medicare? Do they have a copy of their current insurance card(s)?
- Do they need help identifying the name(s) of the drug(s) and the dosing they receive at your office?
- Have they confirmed that their current insurance will continue to cover the injections they receive at your office?
- Do they know their out-of-pocket costs for these medications next year?
- Would they like a list of questions to ask their insurance representative about coverage?
- Do they plan on keeping or changing their insurance during Open Enrollment?

NEW ENROLLEES TO MEDICARE

- Do they understand the Medicare options available?
- What are the most important factors for them when they are evaluating health insurance options?
- Do they understand the differences between Traditional Medicare and Medicare Advantage?
- Do they understand the implications of switching Medicare insurance options?
- Do they understand the difference between Medicare Advantage and Medigap?

It is important for patients to understand total yearly expenses and the types of medications covered under Part B (medications/injections administered at the doctor's office, such as SYFOVRE) and Part D (medications picked up at the pharmacy).
